

# K Kanishthika

📍 Coimbatore, India | 📞 (+91) 6379873249 | ✉ [kkanishthika1@gmail.com](mailto:kkanishthika1@gmail.com) | **in** [Kanishthika K](#) | 🌐 [Portfolio](#)

## CAREER OBJECTIVE

Computer Science Engineering student with a keen interest in developing software solutions and exploring emerging technologies, eager to apply technical skills to real-world projects. Adaptable to new technologies, quick to learn, and passionate about innovation, continuous learning, and contributing effectively in collaborative environments.

## EDUCATION

|                                                                    |                  |
|--------------------------------------------------------------------|------------------|
| <b>B.Tech in Computer Science and Engineering</b>                  | 2023 – 2027      |
| Amrita School of Computing, Amrita Vishwa Vidyapeetham, Coimbatore | <b>8.53 CGPA</b> |
| <b>AISSCE (Senior Secondary)</b>                                   | 2022 – 2023      |
| Adithya International School, Coimbatore                           | <b>90.0%</b>     |
| <b>ICSE (Secondary)</b>                                            | 2020 – 2021      |
| Little Angels' English Hr. Sec. School, Karur                      | <b>91.6%</b>     |

## AREA OF INTEREST

- Data Science and Machine Learning
- Full-Stack Development

## CERTIFICATIONS

- Foundations of Programming and Data Science – IIT Madras [\(Credentials\)](#)

## PROJECTS

### IntelAcad (Full-Stack Web Application) [\(GitHub\)](#)

- Engineered a comprehensive student support platform providing academic and career guidance through personalized roadmaps, centralized profiles, and resume evaluations.
- Developed end-to-end Certification and Internship modules, implementing secure backend architecture, robust user authentication, dynamic data management, and streamlined user interfaces.
- Integrated workflows for feedback, internship postings, applications, and reviews, supported by analytics such as skill trends and internship insights.

### Schedula (Software Development) [\(GitHub\)](#)

- Engineered an automated academic timetable scheduling system using a Greedy Backtracking with Constraint Satisfaction algorithm, resolving multi-dimensional resource conflicts (faculty, rooms, sections) with zero scheduling overlaps, and deployed the application via automated CI/CD pipelines.
- Contributed to the core scheduling module and operated as a QA Tester within an Agile (Scrum) environment across three sprint cycles. Executed comprehensive end-to-end, API, integration, and regression testing to validate algorithmic constraints, update sprint backlogs, and ensure defect-free iterative releases.

### Comment Classifier (Data Science & Machine Learning) [\(GitHub\)](#)

- Developed a machine learning pipeline for comment classification using TF-IDF vectorization, feature engineering, and data preprocessing techniques on text and metadata features.
- Trained and evaluated models including Logistic Regression, LightGBM, and XGBoost ensemble, achieving a Kaggle public score of 0.802.

## TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++, Haskell, Go.
- **Web Development:** HTML5, CSS, JavaScript, React.js, Node.js, Express.js.
- **Databases:** MongoDB, MySQL, PostgreSQL.
- **Tools:** VS Code, Keil, GitHub, MATLAB, Jupyter Notebook, Eclipse, Postman, Tableau.
